

Noise reduction

Acoustic barriers on construction sites

FlyPix: Construction site noise reduction walls
Made in France - Custom-made - Manufacturer's warranty + after-sales service

Custom manufacturing of acoustic and noise-reducing inflatable walls for urban construction sites, building and public works projects, factories, and industrial sectors. We also produce inflatable shelters and noise-reduction tents for indoor and outdoor use. Lead time: 15 days. Sizes: large sizes available, custom sizes. Proof produced in our graphic design studio. Delivery throughout France, its overseas territories, and internationally. On-site installation available. Tell us about your project.
